

Milling Machine

NSN: 3417-00-624-4254
LIN: M44486
TM: 9-3417-210-10

System Description

This milling machine is floor mounted, knee -type machine which consists of digital readout, coolant and electrical systems. All gears, pinions, and spindle drive components are capable of operating for 10,000 hours or five years, whichever comes first. Input is 3 phase/60 hertz and output is 3 horsepower electric motor.

System Mission

To provide the military-civilian machinists with a means to perform precise milling of machine parts to support the sustainment of equipment/weapon systems within maintenance units/activities. Milling machine is used for vertical and horizontal milling, drilling, and boring operations on ferrous and non-ferrous metals. It has a ram mounted spindle with ram supported horizontal arbor supports.

Reset Responsibility

Unit

Reset Location
